Description

The general purpose meter reads engineering units with one level transmitter input channel and is offered in three configurations. Select the meter only for indication, the meter with 2 relays for indication and automation, and the meter with 4-20 mA repeater for signal isolation. Each relay can be configured on a single set point, two latched set points for tank automatic fill or empty with pump alternation and lead-lag functions. With the optional MeterView® PC calibration kit, users can conveniently program or clone meters, save meter profiles, datalog and export data to HTML or TXT file formats. The NEMA 4X faceplate and 1/8 DIN enclosure supports panel mount installations.

Features

- ✓ Compatible with Flowline level transmitters, and third party voltage, thermocouple or RTD inputs
- ✓ Relay alternation and lead-lag control functions optimize pump performance
- ✓ High intensity LED display is readable in outdoor direct sunlight applications
